Appendix B

I personally met with David and showed him my product. Below is his provided reaction on the product and on all success criteria.

David's reaction on success criteria showed in the video:

Criterion	Definition	Met?	Comment
2	The website is protected by a	Yes	
	username and password		
3	User will be automatically log out	Yes	
	of the website after a certain time		
	of inactivity has elapsed		
4	User will be able to choose a .csv	Yes	
	file to upload into the database		
5	The website will display time	Yes	
	when the file was lastly updated		
6	User will be able to download a	No	David commented that this criterion
	.csv file of latest upload from the		was not met, but the provided
	database		alternative was satisfying.
7	User can send a notification	Yes	
	which will be stored in the		
	database and upon request sent		
	into the application.		

Table 1. User's reaction on the product. Success criteria which are also shown in the video.

David's reaction on success criteria which could not be showed in the video, but were tested with the user.

Criterion	Definition	Met?	Comment
1	The website is clear, easy to	Yes	David quickly understood the
	understand and use		webpage and could easily operate
			on it.

8	My client's application will be	Yes	We tested this criterion together
	able to communicate with all of		and David was very pleased with the
	the proposed tables that will be		result.
	stored in the database		
9	The communication between the	Yes	For a device ID not stored in the
	database and the application will		database, the communication was
	be always verified by device id		unsuccessful. Hence, it is this way
			protected from the possible third
			party intervention.
10	The communication between the	Yes	David liked that only new
	database and the application will		notifications and tables were sent to
	be only performed if the data		his application, thus avoiding
	stored in the application is not up		duplication of data in the data
	to date with the data stored in		transfer.
	the database		

Table 2. User's reaction on the product. Success criteria which could not be shown in the video.
